

# CAN YOU COMPLETE THE:

Blackheath High School, an Independent Day School for girls aged 3 to 18, has launched **The Mighty Girls Challenge** - a unique challenge-based programme aimed at inspiring girls to develop core skills that will be central to their development now and in the future.

They have kindly shared some of these challenges to provide a free resource of activities to complete over the holidays, aimed at Year 2 students. The programme focuses on helping children to become even more **Ambitious**, **Brave** and **Curious** and gets more challenging each year for increasing age groups.

For each activity, children should share what they achieved, what they learned and what qualities they showed. This is an opportunity to let creativity run free over the holidays and to have fun learning some new skills!

This challenge programme has been created with the input of Blackheath High School's Year 6 Mighty Girls Club, an empowering collective group of young feminist Year 6 pupils, as well as being inspired by the key skills that the World Economic Forum says will be critical to entering the future workplace.

The challenges reflect the skills and qualities Blackheath High School values in its students and embodies the school's ethos of **'Where Girls Boldly Go'**.

# BLACKHEATH HIGH MIGHTY GIRLS

CHALLENGE

HALF TERM HOLIDAY CHALLENGE!

✓ Ambitious

✓ Brave

✓ Curious

## Here are some suggested activities:

- Tick each task off as you complete it!

### Ambitious:

- Learn to say "Hello, my name is" in three different languages. Then teach someone else how to say this.
- Learn and perform a magic trick. Practise your trick until you can confidently perform it to an audience, without them guessing how to do it!
- Read three books or watch three films that you are interested in. Write a review about each, or film yourself reviewing them, giving recommendations to others.

### Brave:

- Cook something new using some ingredients that you would like to try for the first time.
- Learn a dance from another country or culture and perform it to an audience. Practise your dance until you can perform it confidently.
- Build a model with moving parts. This could be using Lego, junk models, timber kits or devise your own from scratch.

### Curious:

- Make an origami model. Write the instructions and teach someone else how to make one too.
- Make a den and test it out. Is it a stable shelter? How could you improve it?
- Identify three trees by their leaves and be able to point these out to friends. Draw and label the leaves.

Good luck, you can do it!
